
PARKMOBILE OVERVIEW

PARKING MADE SIMPLE.™ WE'VE CREATED PARKING MANAGEMENT SYSTEMS WITH PARKING PROVIDERS AND DRIVERS IN MIND. THERE IS NO OTHER PARKING SYSTEM ON THE MARKET THAT OFFERS THE SAME LEVEL OF FLEXIBILITY, SCALABILITY, AND CUSTOMER SATISFACTION.

Parkmobile's benefits:

We're a stable, growing company.

Parkmobile USA is an American-based company with offices and a call center here in the U.S. We're one of the largest cashless parking providers in the country.

Millions of people use Parkmobile.

We offer a great customer experience. Our parking management systems are well-tested and implemented in over 100 cities worldwide.

We inspire people to join.

Our adoption rates average 15% in the first year and 35% within three years. Recent surveys show 95% of our customers are satisfied or highly satisfied with Parkmobile.

Parking providers save time and money.

Cashless parking streamlines payment processing and reduces shrinkage. Our system is flexible so providers can sell special event parking, off-peak parking, or create other revenue-generating programs.

Consumers can save time and money too.

Parkmobile makes it easy to avoid tickets and towing. Our online permitting system means people can apply for parking permits at their convenience, without waiting in line.

We make permit processing much more efficient.

Your digital parking permit system makes it more convenient for people to apply, renew or update their permits. Permits and payments are processed in a fraction of the time.

Enforcement is easier and more accurate.

We're hardware agnostic and can provide data feeds to license plate recognition (LPR)-driven systems or integrate with any other legacy enforcement systems.

We provide very useful data.

Parkmobile brings all the information together into one centralized data management system. Parking providers can go online and pull daily, weekly or monthly parking reports using whatever metrics are most helpful.
